## New as of 1st June 2018: CE / IVD Labelling for Cryo.s™ Biobanking Tubes!

Dear Sir or Madam,

We constantly strive to meet the high demands on our products in terms of safety and quality and to improve them wherever possible.

We are pleased to announce that our Cryo.s™ Biobanking tubes, like our standard Cryo.s™, will receive the CE / IVD label as of 1st June 2018.

For our customers, this change opens up further applications for these products in the diagnostic field.

That means:

1. All batches from lot number E1806XXXX are delivered with CE / IVD marking.
2. On this date, the purpose will change and read as follows:  
“Cryo.s™ Biobanking Tubes are for storage of tissue, cells, fungi, bacteria, spores, cellular extracts or body fluids at ultra-low temperature for research and development as well as diagnostic purposes. Cryo.s™ Biobanking tubes must not be stored in the liquid phase of liquid nitrogen, but only in the gas phase above. Cryo.s™ Biobanking tubes are not intended for any application in the context of reproductive medicine.”.

The affected products are listed in the attached document „Product Overview\_CE IVD Marking\_Biobanking.xlsx“.

If you have questions, please contact our product manager Sven Mühlfriedel (+49 7022 948-410 or [sven.muehlfriedel@gbo.com](mailto:sven.muehlfriedel@gbo.com)).

Kind regards,

i.V. Michael Wirth  
Director Marketing & Product Management
