IVUS
Unique Lab Results

User friendly

The IVUS kits are packed in peel-pack bags or boxes and contains all you'll need for the single-use urine sample collections for biological analysis. The kits are easy to hand out for the laboratory staff and very user friendly for the patient.

Sterilized & hygienic

IVUS is designed to simplify and facilitate clean urine collection for regular and advanced testing. All kits are sterilized as IVUS is dedicated to deliver the highest standards within urine kits to hospitals and laboratories to provide the best test results.

Safe & reliable

The simple and clean test kits are safe and leaves the technician in the laboratories with the best test results. The kits are carefully being followed from raw material and production to the user which ensure the best standards. Produced according to CE-IVD guidelines.
